PROFESSIONAL EXPERIENCE

Jr. Full Stack Developer, SparkTech Agency

Dec 2024 - Present

- Engaged in actual production projects, where I played an active role in developing scalable, maintainable, and high-quality backend code utilizing contemporary technologies and industry best practices.
- Worked in close partnership with UI/UX designers and frontend developers to thoroughly grasp client needs. Contributed significantly to the development of backend architecture that supported business objectives and enhanced system adaptability.
- Acquired practical experience in crafting and implementing efficient, well-documented RESTful APIs. Emphasized creating frontend-friendly APIs to facilitate seamless integration and enhance performance in live environments.

MY SKILLS

Expertise: Html5 | Css3 | Tailwind CSS | JavaScript | Es6 | TypeScript | React.js | Next JS | Shadcn/ui | Redux | Next Auth | Framer Motion | Stripe | NodeJS | ExpressJs | MongoDB | Mongoose | JWT | Redis

Comfortable: Material UI | Tailwind Material UI | Ant Design | Next UI | Rest Api | Aggregation Pipeline

Tools: ReduxDev | VS Code | Canva | Figma | GitHub | Vercel | Rander | Firebase | Docker

Soft skills: Communication | Problem Solving | Teamwork | Deadline Oriented | Feedback reception

PERSONAL PROJECTS

TASTYHUB:

[Live Link](#) | [Client Side Repo](#) | [Server Side Repo](#)

TastyHub is a dynamic web app for discovering, sharing, and managing recipes. It offers an intuitive interface for users to browse, share, and rate recipes, with features designed for both regular users and admins. The platform ensures secure user authentication, smooth recipe management, and an engaging cooking community experience.

Features:

- Explore a vast collection of recipes or share your own with detailed instructions, ingredients, and high-quality images.
- Users can manage their favorite recipes, ratings, and comments, while admins oversee approvals and moderate content effectively.
- Quickly find recipes by name, category, cuisine, or dietary preferences using powerful filtering and search options.

Technology : Next.js | Tailwind css | Shadcn | Redux | Typescript | RTK Query | ExpressJs | Mongodb | Mongoose | JWT

MAPMYFITNESS:

[Live Link](#) | [Client Side Repo](#) | [Server Side Repo](#)

MAPMYFITNESS is an online fitness platform designed to offer users a personalized and engaging fitness experience. It provides various features for managing fitness plans, tracking progress, and connecting with trainers. The platform includes role-based dashboards for users and admins and a secure payment system through Stripe.

Features:

- Multi-role dashboard management for different users (admin, trainer, user).
- Admin monitoring system for managing users, trainers.
- Stripe integration for secure payments.

Technology : React.js | Tailwind CSS | Axios | TanStack Query | Firebase | Node.js | Express.js | MongoDB | JWT
